Country Profile (PDF)

Topographic

The national mapping agency in Bahrain is the **Survey Directorate (SD)** which was established in the Ministry of Housing in the late 1970s. The basic topographic mapping of the state as a whole is a 28-sheet 1:10,000 series on the UTM projection, International ellipsoid, first compiled in 1977 on a contract with **Fairey Surveys**, as orthophoto editions and subsequently revised regularly as a two-color line map with 2 m and 5 m contours. Intermediate full-color series were derived from these maps and published at 1:25,000 scale (seven sheets), and 1:50,000 scale (three sheets), with single-sheet 1:100,000 and 1:200,000 scale coverage also being issued. A regular revision program maintains these maps with a currency of no less than three years for developed areas of Bahrain.

In the north of the island the developed areas were compiled as digital mapping in a **BKS Surveys** contract in the early 1980s and are held in an Intergraph mapping database. These include 1:1,000 scale coverage in 9,449 sheets, as well as 220 sheets of a 1:2,000 scale series. The large scale map database is under constant revision with print on demand to support a wide variety of official applications including land registration and transfer and the provision of utility services.

Soviet military topographic mapping of Bahrain exists at the following scales: 1:1,000,000 (1 sheet, complete coverage, published in 1983); 1:500,000 (2 sheets, complete coverage, published 1977-1981); 1:200,000 (2 sheets, complete coverage, published in 1977); 1:100,000 (7 sheets, complete coverage, published 1978-1984) and a city topographic map of Manamamuharraq (Manama, Muharraq) published between 1977 and 1980. These product are available in print, digital raster and digital vector GIS formats from **East View Geospatial**.

Nautical

A hydrographic section within **SD** is responsible for hydrographic surveying and maintains 10 nautical charts of Bahrain's coasts.

[Back to top](#)

Thematic

Among thematic mapping of the state was the *Surface materials resources study* carried out by British geomorphologists in the late 1970s, with 1:50,000 scale coverage published for six environmental and earth science themes. These maps are accompanied by text explanations.

[Back to top](#)

Cadaster

The **Directorate of Physical Planning** in the Ministry of Housing is responsible for maintaining digital cadastral data and planning maps of Bahrain.

[Back to top](#)

Tourist/Reference

The best commercially published map of Bahrain is published by **GEOprojects** in their *Arab World map library* series and includes a useful city map of Manama the capital.
