Historical Country Mapping Information

Country Profile (PDF)

Topographic

Since 1958 Christmas Island has been administered by Australia and mapped as part of the external territories program. The **Australian Surveying and Land Information Group** (**AUSLIG**) currently publishes three maps of the island on the UTM projection, Australian National spheroid, WGS 1972. A 1:25,000 sheet with 10 m contours covers the whole island. A 1:10,000 scale two-color orthophotomap shows relief with 10 m contours, and covers the settlement area, while a second orthophotomap with very similar specification maps the national park area.
