Country Profiles (PDF)

Topographic

Official mapping of the Principality of Liechtenstein is the responsibility of **Fürstliche Regierung Liechtenstein**. A four-sheet 1:10,000 scale series is the largest scale available and is regularly revised, the latest edition being published in 1989. In addition the principality is covered by Swiss and Austrian official topographic surveys at 1:25,000 and 1:50,000 scales.

Locally published mapping is derived from these sources and produced largely for the tourist market. The 1:25 000 scale *Landeskarte* has 20 m contours and is a composite of published Swiss mapping.

Soviet military topographic mapping of Liechtenstein exists at the following scales: 1:1,000,000 (1 sheet, complete coverage, published in 1985); 1:500,000 (1 sheet, complete coverage, published in 1985); 1:200,000 (1 sheet, complete coverage, published in 1986); 1:100,000 (2 sheets complete coverage, published in 1985) and 1:50,000 (4 sheets, complete coverage, published in 1984). These products are available in print, digital raster and digital vector GIS formats from **East View Geospatial**.

Geological/Scientific

The **Regierung** publishes a geological map of Liechtenstein at 1:25,000 scale, which is derived from 1:10,000 scale surveys and edited by **Professor Dr F.Allemand** in the **University of Bern**.

Tourist/Reference

Swiss commercial mapmakers **Schad & Frey** compile a 1:50,000 scale tourist map for **LFVZ**, which shows relief with 100 m contours and shaded tints, has a trilingual legend and is also available with an overprint of marked walking routes.
