Country Profile (PDF)

Topographic

Tuvalu comprises the sparsely populated Ellice Islands in Polynesia. The official mapping body is the **Department of Lands and Surveys (TDLS)** in the **Ministry of Home Affairs and Rural Development**. Mapping of this small island state was carried out in the late 1970s, under British overseas technical assistance programs, by the **British Directorate of Overseas Surveys (DOS)** (now **Ordnance Survey International (OSI)**). Orthophotomapping of the islands was compiled using the Transverse Mercator projection and International ellipsoid. Islands were published at different scales in a series comprising six sheets.

Soviet military topographic mapping of Tuvalu is available at the following scale: 1:1,000,000 (2 sheets, complete coverage, published in 1965). This product is available in print, digital raster and digital vector GIS formats from **East View Geospatial**.

Nautical

Seas around the islands appear on Admiralty charts published by the British **Hydrographic Office (HO)**.
