

# GIS Edition ECUADOR 2010 CENSUS (ADM 6)

- 96% population coverage
- 129,149,055 data points
- ADM 6 for 232,701 census units
- 555 census variables

**More than numbers.** Census data provides unparalleled insight into the lives of individuals. East View presents the Ecuador 2010 Census at administrative level 6 (Manzanas) as part of the East View Global Census Archive® (GCA). The Ecuador 2010 Census addresses a wide range of topics at the highest level of detail possible.

**Making information available.** When initially acquired, the census data is stored in a complex database structure, with attribute descriptions in Spanish, limiting access to those with significant database management and programming experience. East View simplifies access, formatting the collection into an easy-to-use geodatabase which can be visualized using any GIS software and providing a comprehensive guide. Additionally, East View provides the original census documentation, allowing researchers to see first-hand how the data was gathered.

**Note:** The Ecuador 2001, 2010 (ADM 5), and 2022 censuses (GIS editions) are also available through GCA
