Historical Mosaics: 1:5,000 scale mosaic of the Chornobyl electrical station

East View Geospatial has nearly 30 years' experience in sourcing, procuring, and producing geodata and population data. Utilizing a talented in-house team of geospatial analysts and production specialists, East View Geospatial offers a wide variety of services designed to suit your needs.

GEOINT

► Foundation Data (FD) production

- TDS
- MGCP
- Other customer-specified schemas

► Off-shore full-spec FD production

· CONUS QA/QC and project management

► FD conflation and integration

Cartographic production and finishing

- TM/MTM
- JOG
- TPC
- · Custom cartographic products

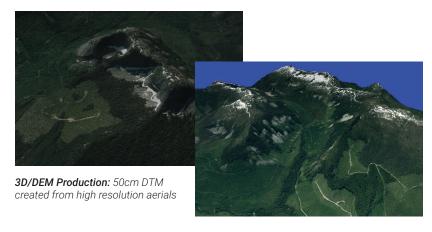

▶ Data QC/QA

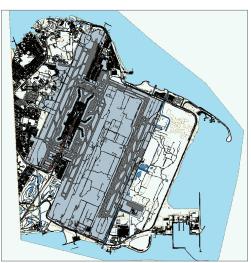

- · Development of processes and workflows
- Use of automated QA/QC tools, such as Data reviewer, Batch checks, and Geospatial Analysis Integrity Tool (GAIT)

► Training and capacity building for data production and/or cartographic finishing

- · In-person or remote training
- Proprietary documentation

► Imagery analysis/intelligence gathering

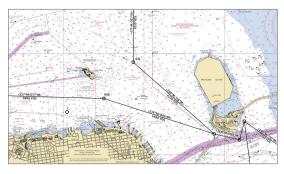

Data Collection: 1:2,000 scale data collection over Singapore from high resolution imagery

Historical Mapping: 1:2,000 scale mosaic of Plymouth, MN section maps from the 1960s

Custom Mapping: Overlay of waypoints/track lines on a nautical chart

Custom Mapping: Custom multi-state map of New York, Vermont, and New Hampshire

COMMERCIAL

▶ Digitization

- Wide format preservation quality high-resolution scanning of map materials
- Newspaper/atlases on flatbed/cradle machines
- Image/text clean-up, Optical Character Recognition (OCR), translation services
- GIS feature data extraction from mapping materials into customer-specified data schema

Print on demand

- Wide format printing (media options: economy and premium paper, Tyvek, adhesive, water-resistant, polypropylene, canvas, vinyl)
- Light manufacturing options: lamination, encapsulation, hanging bars, board/substrate mounting, framing, canvas framing, folding, trimming

► Raster production

- · Image cleanup
- · Georeferencing, map marginalia cropping
- Mosaicing/tiling of large datasets into JP2, ECW, GeoTIFF, COG, MBtiles, etc.
- Web Mapping Tiling Services (WMTS) mosaic production and data hosting
- IIIF-based data hosting and viewing
- Format conversions: CADRG, ECRG, MrSID, CIB and other formats

GIS vector data collection: topographic/geological/nautical/ aeronautical

- · Feature extraction from raster maps, satellite/aerial imagery
- Building databases (1D, 2D, 2.5D, 3D)
- Custom map overlays (nautical and aeronautical charts)
- Airport Mapping Databases (AMDB)
- · Land use/clutter data
- · Format conversions: CAD, fGDB, VPF and other formats

► Imagery processing

- Orthorectification
- · Pan-sharpen/color balance/mosaicking of multiple scenes
- · Image clean-up, cloud removal, feathering
- GCP integration

► 3D/DEM production

- DSM/DTM production from aerial (up 1m spatial DEM resolution), overlapping mono, stereo imagery sources
- · Format conversions: DTED, GeoTIFF, and other formats

SAR data sourcing, processing, and analysis

Professional translation services

· Chinese, Ukrainian, Arabic, Russian and other languages

Metadata/cataloging services

- Collection cataloging, coverage index maps production
- ISO, FGDC and MARC records
