HONG KONG 2016 CENSUS

- 100% population coverage
- 164,234 total data points
- ADM 5/6 for 3,922 total census units
- 100 total census variables

More than numbers. Census data provides unparalleled insight into the lives of individuals. East View presents the Hong Kong 2016 Census as part of the East View Global Census Archive® (GCA). The Hong Kong 2016 Census addresses a wide range of topics at the highest level of detail possible.

Making information available. When initially acquired, the census data is stored in a complex database structure, with attribute descriptions in Chinese, limiting access to those with significant database management and programming experience. East View simplifies access, formatting the collection into an easy-to-use geodatabase which can be visualized using any GIS software and providing a comprehensive guide. Additionally, East View provides the original census documentation, allowing researchers to see first-hand how the data was gathered.

Note: The Hong Kong 2011 Census (GIS Edition) is also available through GCA
