IRĀN / ايران, IRĀN 2011 CENSUS

- **75% population coverage**
- **1,427,268 data points**
- **ADM 4 for 4,299 census units**
- **332 census variables**

More than numbers. Census data provides unparalleled insight into the lives of individuals. East View presents the Iran 2011 Census as part of the East View Global Census Archive® (GCA). The Iran 2011 Census addresses a wide range of topics at the highest level of detail possible.

Making information available. When initially acquired, the census data is stored in a complex database structure, with attribute descriptions in Persian, limiting access to those with significant database management and programming experience. East View simplifies access, formatting the collection into an easy-to-use geodatabase which can be visualized using any GIS software and providing a comprehensive guide. Additionally, East View provides the original census documentation, allowing researchers to see first-hand how the data was gathered.
