

More than numbers. Census data provides unparalleled insight into the lives of individuals. East View presents the Malaysia 2000 Census as part of the East View Global Census Archive® (GCA). The Malaysia 2000 Census addresses a wide range of topics at the highest level of detail possible.

Making information available. When initially acquired, the census data is stored in a complex database structure, with attribute descriptions in Malay, limiting access to those with significant database management and programming experience. East View simplifies access, formatting the collection into an easy-to-use geodatabase which can be visualized using any GIS software and providing a comprehensive guide. Additionally, East View provides the original census documentation, allowing researchers to see first-hand how the data was gathered.

Note: The Malaysia 1991 Census (GIS Edition) is also available through GCA

CENSUS OVERVIEW

Year: 2000

Population Coverage %: 95.4

Geography Coverage %: 100

Smallest Geography Name: Census Zone Numbers

ADM Level: 4

Polygons at ADM: 16,043

Number of Questions: 11

Number of Answers: 125

Data Points: 2,005,375

Urban/FG: FG

Notes

- Population Coverage % indicates the percentage of total population of the country during the census year that this census covers
- Geography Coverage % indicates the percentage of the total area of the country covered by the ADM polygons in this census
- Urban/FG indicates if this census provides Full Geographic (FG) coverage or if coverage is limited to Urban (U) or populated places

DELIVERABLES

The Malaysia 2000 Census has 95.4% population coverage, over 2 million data points, and consists of:

Geodatabase

- Intuitive organization of census data
- Administrative boundary vector data at ADM 4 (Census Zone Numbers) for 16,043 census units
- Vector and aggregated tabular data at the Census Zone Numbers level

Shapefiles

- All vector and census data in ESRI Shapefile format

Census Guide

- Detailed descriptions for 125 census variables

Original Census Documentation

- Delivered in source format
- Census questionnaires

Metadata

- Full attribute level metadata in FGDC ISO format

ADM 4/3/2/1/0 boundaries for all of Malaysia; area in red, over Perak state, available as sample data
