- ADM 5 for 84,907 census units
- 907 census variables

More than numbers. Census data provides unparalleled insight into the lives of individuals. In the first offering of its kind, East View presents the South Africa 2011 Census as part of the East View Global Census Archive® (GCA). The South Africa 2011 Census addresses a wide range of topics at the highest level of detail possible and offers a premier source of demographic data for academic research.

Making information available. When initially acquired, the South Africa census data is stored in a complex database structure, only viewable in SuperCROSS software, limiting access to those with significant database management and programming experience. East View simplifies access, formatting the collection into an easy-to-use geodatabase which can be visualized using any GIS software as well as providing a comprehensive guide. Additionally, East View provides the original census documentation, allowing researchers to see first-hand how the data was gathered.
