## The World at Your Fingertips

East View Geospatial has the largest commercial collection of maps and geospatial data from around the world. From historical datasets to new productions, we regularly procure and fulfill special requests.

# SOURCE

## Bringing Our Global Network to You

**East View Geospatial has an unparalleled network of data and content providers around the world**

For over 25 years our strategy has been to be the leading knowledge center for the world's maps and geospatial data. From academics to individual explorers, risk assessors to software integrators, East View Geospatial is the trusted source for authoritative, accurate cartographic products.

We've partnered with hundreds of mapping authorities and publishers, from national mapping agencies to nautical and geological agencies, to bring you authoritative content direct from the source.

We've also centralized many commercial offerings, from satellite imagery to digital elevation models (DEMs), allowing customers to evaluate their many options in one place.

**Not sure where to find data, or if it exists?**

We'll deploy our procurement team to track it down for you. With field offices across six continents, we'll travel to the far corners of the world to find what you're looking for.

## OUR PRODUCTS

- Maps
- GIS Data
- Satellite Imagery
- Digital Elevation Models
- Population Data

Soviet Military 1:25,000 City Plan,  
New York City, published 1982

## Analytics as a Service

One of the major benefits of satellite imagery is seeing beyond the visible spectrum. In this case, Short-Wave Infrared sensors penetrate smoke obstruction, revealing the true extent of the 416 Fire northwest of Hermosa, Colorado.

Natural Color, Hermosa, Colorado

SWIR Composite, Hermosa, Colorado

## Real-Time Insights and Information

**We're keeping an eye to the future to bring you the latest geospatial products and services**

In the age of analytics, geospatial data is in demand like never before, and organizations are looking to leverage spatial analytics to make smarter, faster decisions at scale.

At East View Geospatial, we're responding by developing new analytical services for our clients around the world. Whether monitoring assets using the latest in earth observation technology or providing training and capacity building services, we're equipping our partners with the tools they need to bring spatial analytics to their organization.

### OUR SERVICES

- Spectral and Hyperspectral Analysis
- Synthetic Aperture Radar (SAR) and Light Detection and Ranging (LiDAR) Processing
- Site Monitoring Change Detection Analysis
- Machine Learning Training Data
- Training and Capacity Building
