LandScan Population Database

LandScan is an award-winning database developed by the Oak Ridge National Laboratory for the United States Department of Defense. At a resolution of one kilometer, LandScan is the world's most accurate and reliable global population distribution model. It is an ideal resource for sustainable development, risk assessment, strategic planning, humanitarian aid, disaster response and disease modeling, and an essential analysis tool for insurance, telecommunications and other business applications. LandScan is available for purchase by country, region or globally.
