East View Geospatial Awarded Top Ten Esri Consulting Company

East View Geospatial (EVG) is honored to have been chosen as a 2020 Top 10 Esri Consulting Service Company by CIO Applications Magazine. This award is given once a year to “prominent players who are setting benchmarks in Enterprise GIS Consulting, GIS Application Development, GIS Data Development, and Implementation.” CIO Applications is a leading enterprise technology print magazine that is a go-to resource for all the technology decision-makers.

East View Geospatial is a proud recipient of this award as for over 25 years they have been dedicated to providing premier geospatial solutions to their clients worldwide. They serve as an authoritative source, producer, and distributor of accurate, up to date global geospatial data for their customers. Harnessing the software and tools offered by Esri, EVG has provided solutions for over 10,000 companies across more than 30 industries in over 150 countries around the globe.

The CIO Team sat down with East View Geospatial’s CEO, Kent Lee, to discuss how EVG continues to be a prominent player in the industry, current trends & challenges and what the future looks like for the company and industry as a whole.

“An emerging trend in the space that is driving new geospatial development is the automation and acceleration of the cartographic process. We intend to leverage our decades of experience working with data providers along with our strong foundation in Esri-based cartography to bring innovative workflows to national mapping and statistical agencies, as well as to create robust solutions for business and consumer mapping.”

With over 25 years of experience, and offices and representatives across six continents and ten cities, EVG’s imagery and map exploitation capabilities are second to none and allow the production of highly detailed and accurate geospatial databases. The company offers an ever-expanding library of over 1.5 million maps and over a petabyte of digital geospatial data, including topographic and scientific mapping, satellite and aerial imagery, elevation models, population datasets, and more. East View Geospatial continues to be on cutting edge of innovation and technology within the geospatial industry and strives for continuous growth in the new decade.
