

NOW AVAILABLE FROM EAST VIEW GEOSPATIAL

East View Geospatial (EVG) is pleased to present the release of **EVMAP50-WSM**: a new series of 1:50,000 scale topographic mapping comprised of 16 map sheets covering the entire Polynesian island nation of Samoa. The island's country-wide mapping at this scale had not been updated since 2000, identifying a clear need for updated coverage.

EVMAP50-WSM OVERVIEW

- Series Name:** EVMap50-WSM: Samoa 1:50,000 Scale Topographic Map Series
- Scale:** 1:50,000
- Publisher:** East View Geospatial, Inc.
- Map Sheets:** 16
- Publish Date:** 2020
- Language:** English

Leveraging a combination of authoritative topographic, bathymetric and elevation data, the entire series has been updated and cartographically finished based on MTM50 styling and symbology. This Samoan dataset includes features such as: topographic relief contours, landcover, hydrography, road networks, volcanos, mountain peaks, buildings, and reef lines. The Samoan nautical dataset includes features such as sounding depths, bathymetry, ship wrecks, ferry routes, buoys, and hazardous rocks.

AVAILABLE FORMATS

EVMAP50-WSM can be licensed and made available in a variety of formats including:

Digital Raster

- Individual Map Sheets (TIF, GeoTIFF, GeoPDF, etc.)
- Seamless Mosaic (GeoTIFF, MbTiles, other tile packages, etc.)
- Digital Atlas
- Web Mapping Tile Service (WMTS)

Spatial Database

- Complete Dataset, Individual Sheets, or Individual Layers
- ESRI Shapefiles (SHP), Geodatabase (GDB), etc.
- Web Mapping Service (WMS)

Index Metadata

- Series PDF Index Map, ISO Record
- Sheet Level Index: ESRI Shapefile (SHP)/Geodatabase (GDB)
- MARC Records

Custom Deliveries

- EVG is committed to working with our customers to meet their requirements
- Data can be made available for a custom area or in special formats
