Featured Atlases

21-12-012 | \$229.00 | [PURCHASE](#)**Barentsevo more : ekologicheskii atlas [Barents Sea: Environmental Atlas, Баренцево море : экологический атлас]**

Arkticheskii nauchnyi tsentr, Rosneft', Russia. 447 pages. ISBN 9785604325643. In Russian. 2020.

The Atlas of the Barents Sea consists of 6 thematic chapters and is a collection of scientific data on physical geography, oceanology, hydrometeorology, and ecology. The publication contains detailed information on the typification of the shores of the Barents Sea, provides up-to-date information on marine mammals, birds, fish, benthos and plankton. The atlas contains more than 55 thematic maps-schemes of the water area and coastal zone of the Barents Sea, many graphs, diagrams, summary tables and artistic illustrations.

The atlas reflects the results of long-term environmental monitoring and research activities of PJSC NK Rosneft at the licensed areas of the Company. The collected data made it possible to update previously known information and supplement modern ideas about the dynamics of the environment. The publication also presents the results of special works on the study of marine mammals - polar bears and walrus, which were carried out within the framework of the corporate program for the conservation of marine ecosystems biodiversity. The goal of the program is to ensure the protection of the population of rare animal species, by the state of which one can judge in general about the balance of the Arctic nature.
