The Panamá 2010 Census has 30.5% population coverage, over 15 million data points, and consists of:

- **Geodatabase**
  - Intuitive organization of census data
  - Administrative boundary vector data at ADM 5 (Barrios Urbanos) for 13,124 census units
  - Vector and aggregated tabular data at the Barrios Urbanos level

- **Shapefiles**
  - All vector and census data in ESRI Shapefile format

- **Census Guide**
  - Detailed descriptions for 1,188 census variables

- **Original Census Documentation and Database**
  - Delivered in native format
  - Census questionnaires

- **Metadata**
  - Full attribute level metadata in FGDC ISO format

---

**More than numbers.** Census data provides unparalleled insight into the lives of individuals. East View presents the Panamá 2010 Census as part of the East View Global Census Archive® (GCA). The Panamá 2010 Census addresses a wide range of topics at the highest level of detail possible.

**Making information available.** When initially acquired, the census data is stored in a complex database structure, with attribute descriptions in English and Spanish, limiting access to those with significant database management and programming experience. East View simplifies access, formatting the collection into an easy-to-use geodatabase which can be visualized using any GIS software and providing a comprehensive guide. Additionally, East View provides the original census documentation, allowing researchers to see firsthand how the data was gathered.

**Note:** The Panama 2000 Census (GIS Edition) is also available through GCA.
